

# Sprint 2 Plan

*Last Revised: 10/23*  
**(10/22 - 11/4)**

## ChoreMates

Katherine Kosolapova - Product Owner  
Nathan Nguyen - Scrum Master  
Maggie Heathcote - Developer  
Annabel Truong - Developer  
Victoria Ayala - Developer  
Ethan Lin - Developer

## Goal

The high level goal for our second sprint is to allow users to create and join a house group. Users will be able to customize their profile and set a display name for what gets shown in their choremates group. In addition, we will be adding the recurrence feature to the chores, so that chore status gets reset after a set amount of time and so that the chores displayed in the chores tab are dependent on their recurrence. Lastly, we'd like to have our app deployed on aws services so we can start practicing CI/CD.

## User Stories [total = 62]

- ☐ RECURRENCE: As someone who wants to build a routine, I want to be able to set chores to recur every so often without creating new chores every week.  
[Total = 18]
  - ☐ send recurrence settings to backend [5]
  - ☐ display only active chores on Chores tab (based on recurrence) [5]
  - ☐ allow the user to set the recurrence of a chore (only once, weekly, every other week, etc) [4]
  - ☐ add overdue tags to tasks that are past the "due" date [4]
- ☐ GROUP: As a college student, I want to be able to join a household group with my housemates so that I can coordinate chores with the people I live with. [Total = 18]
  - ☐ add members group menu [8]
  - ☐ allow a user to create a group and send a unique code or invite link [6]
  - ☐ allow users to join an existing group with a code or invite link [4]

- ☐ PROFILE: As someone who loves personalization, I would like to be able to add a profile picture and customize my account. **[Total = 10]**
  - ☐ create a profile page **[3]**
  - ☐ allow the user to customize their screen name **[2]**
  - ☐ allow the user to set a profile picture **[5]**
- ☐ CLOUD: As a frequent app user, I want to be able to access my app on my home screen regardless of my location. **[Total = 16]**
  - ☐ set up aws rds **[4]**
  - ☐ set up aws ec2 instance **[6]**
  - ☐ get app deployed on aws **[6]**

## Task Assignment

RECURRENCE: Maggie & Annabel

GROUP: Ethan & Nate

PROFILE: Victoria

CLOUD: Kat
