Victoria Ayala - Developer
Ethan Lin - Developer

Actions to Stop Doing

- Putting off getting started/coding

Actions to Start Doing

- Clearly defining what makes a task “complete”
- Using a company coding standard
 - Google JavaScript
 - Discuss our coding standard at Wednesday's meeting
- Writing formal tests
- Merge throughout the sprint, not just at the end

Actions to Keep Doing

- Sending progress updates with screen recordings
- Commenting code and communicating with team members
- Merging early!!
- Discussing issues with the rest of the team and getting help

Work Completed / Not Completed

- Completed:
 - Moved to a shared database with AWS RDS
 - NewChores has customizable recurrence settings which are stored in the database

- Chores page allows users to check, uncheck, add tasks, and delete tasks
- Settings page is further fleshed out
 - users can update their theme and display name
 - users can update their profile picture
- Creating groups
- Sending/receiving group invitations
- Not Completed:
 - Chores being marked as overdue
 - Recurrence making chores reset at a certain time

Work Completion Rate

- 93% of sprint tasks got 100% completed

Burn-Up Chart
